**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. Claim 6 recites the limitation "the virtual image" in the claim. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3,10,11,14,15,17,18,21,25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Okada (4718672).

Okada teaches a slot machine with mechanical reels (3,4,5) super imposed by a LCD video screen (abstract0 further having graphical images (win lines) on the screen.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-9,12,13,16,19,20,22-24, 27 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okada in view of hendrick (6368216).

Okada teaches all limitations of these claims except that it does not teach virtual images and 3-D images on video screen.

Art Unit: 3711

Hendrick teaches virtual and 3-D images on as displays (col.15, lines 1-10). In order to make the game attractive, it would have been obvious to use such commonly known technology as virtual or 3-D images. One of ordinary skill in art at the time the invention was made would have used virtual and 3-D images to make the game attractive.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Inoue (5752881) teaches video application in superimposing one reel outside of other reel. Bachmann (4454670) teaches video screens superimposing vending machines, Weiss (6164645 ) teaches video display superimposing on mechanical reels (Fig.2 broadly speaking) .
